TECHNOLOGY:

- OFFICE 365
- AZURE AD SYNC WITH ADFS
- EXCHANGE 2013
- EXCLAIMER CLOUD EDITION

SUMMARY AND CHALLENGES

Supreme and Seven Seas Group has engaged with LiveRoute to help migrate 1200 users from on-premise MS Exchange mail source to Office 365 tenant with a guarantee of minimum disruption to the business.

- ✓ From: MS Exchange 2010
- ✓ To: Office 365
- ✓ Volume: 8 TB
- ✓ Gradual schedule for Migration
- ✓ Minimize User Interruption
- ✓ Near Zero Downtime

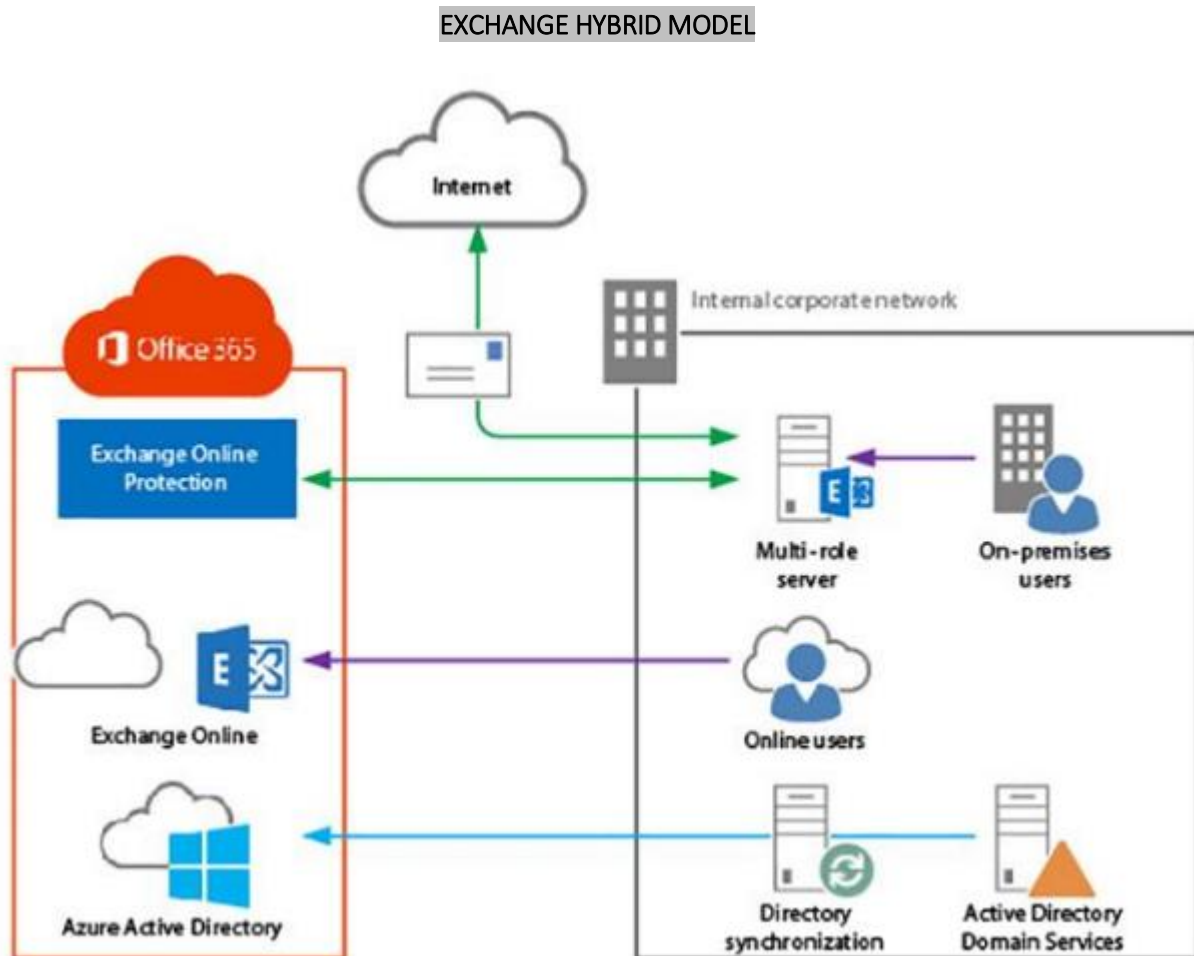

THE SOLUTION

- ✓ Use of MS Exchange 2013 as a Hybrid Migration platform to migrate user's mailbox
- ✓ Provisioning of users, alias and groups using Azure Active Directory sync
- ✓ Zero Downtime during the Migration period
- ✓ Compatible signature solution for Office 365 on multiple platforms
- ✓ Perform Remote Level 2 Support for Help Desk Teams in multiple locations: Denmark, UAE, Switzerland, Germany, United Kingdom, The Netherlands, Singapore and USA

BENEFITS

Moving all Users to a Cloud based operation. Seamless migration of all users' mailbox using Exchange Hybrid approach with federated single sign-on authentication.

DEPLOYMENT APPROACH

FEDERATED IDENTITY

This model requires a synchronized identity but with one change to that model: the user password is verified by the on-premises identity provider Active Directory Federation Services (AD FS). This means that the password hash does not need to be synchronized to Azure Active Directory.
